

## SUMMIT SERIES™ CURB MOUNT SKYLIGHTS

### Designed, Built and Storm Tested in the Rocky Mountain Region Since 1977

DALYTE offers standard stock sizes, custom skylights and replacement domes. Our skylights come standard with thermally-broken aluminum frames for higher energy efficiency. We use only the best, Professional Grade materials with welded heavy gauge aluminum frame and standard longer-lasting cast acrylic. Our skylights are easy to install with built-in tolerances for out of square curbs.

#### FEATURES

- Frames stocked in clear and dark bronze anodized finishes
- Acrylic glazing colors: clear/clear, bronze/clear, clear/white
- Multiple glazing options:
  - Acrylic
  - Multiwall polycarbonate
  - Acrylic domes with multiwall polycarbonate interior
  - Glass

#### OPTIONAL ADD-ONS

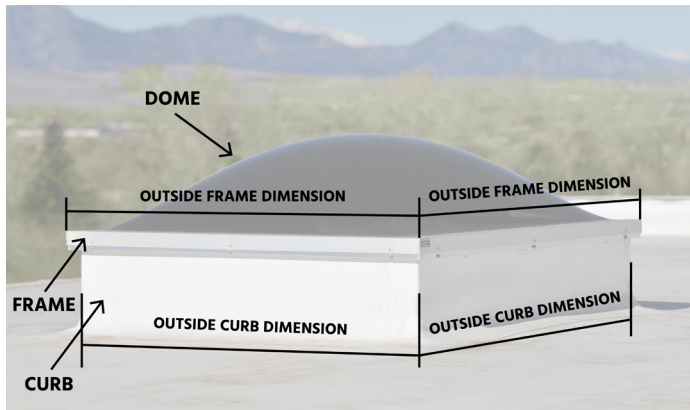

- Custom fall cages
- Installation kits
- Clear heat block acrylic
- Pyramid domes
- Impact modified acrylic
- Self-flashing skylights

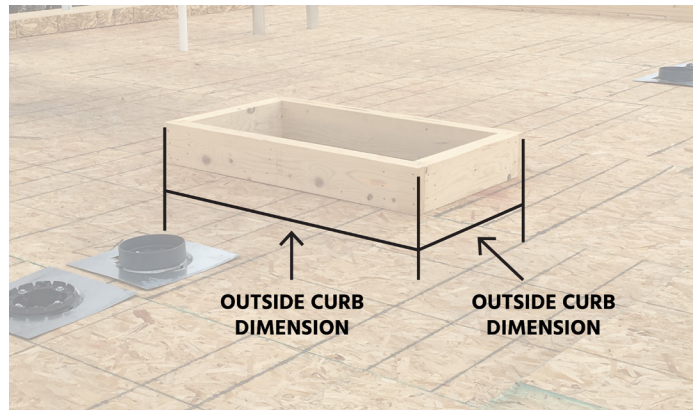

ACRYLIC MODEL #	OUTSIDE CURB DIMENSIONS
2424	25-1/2" x 25-1/2"
2448	25-1/2" x 49-1/2"
2650	26-1/2" x 50-1/2"
4848	49-1/2" x 49-1/2"

# HOW TO MEASURE A CURB

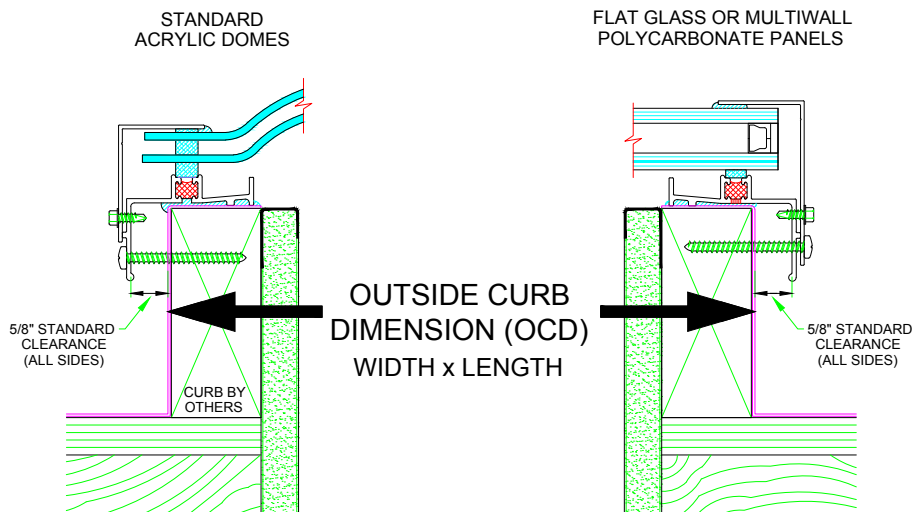

## Replacement Skylight - Flashed Curb

## New Skylight - Exposed Curb

## OUTSIDE CURB DIMENSION

- Always measure the CURB not the skylight frame
- DÄLYTE adds 5/8" standard clearance on ALL sides. The 5/8" clearance is in addition to the curb dimensions provided
- Outside curb dimensions should be taken on the exposed curb if possible
- The 5/8" clearance is for the roofing materials, flashing and out-of-square curbs

DÄLYTE designs, constructs and installs architectural and structural skylights that welcome the sky in, creating stunning spaces. A single source of responsibility means your project is handled by our expert team from initial design through installation. Design your sky with DÄLYTE.
